Latin and Greek Tachiscope

Tachiscopes are generally used for word building with phonograms. Attached are templates for Latin and Greek word building tachiscopes. The teacher xeroxes the templates on card stock (white for the outer "shell" of the tachiscope and different colors for the prefix/suffix or Greek or Latin roots/meanings sliders). The students will build the tachiscopes by following the directions on the templates.

After completion of the tachiscopes, the teacher will ask students to build words or match the words with the meanings.
